Cleaning Instructions

General Cleaning and Care:

EnviroLeather™ has a superior, stain resistant, durable finish. It is designed for easy care and cleaning. The high tech polymer formulation also provides excellent chemical resistance. To maximize the lifespan of your material it is recommended that a regular cleaning schedule be maintained to keep the surface free from dirt and debris. Vacuuming or light brushing is recommended to prevent dust and soil buildup. Spills and stains should be cleaned as soon as possible. Avoid saturation with liquids. Remove any remaining cleaning, or disinfectant solution with a cloth and clean water. Then, dry the surface thoroughly. Use a soft lint-free cloth or towel and avoid steel wool and cleaners containing abrasives.

Always try cleaning method in a hidden area first to determine result. See our Chemical Resistance Data Chart at enviroleather.com for information on other cleaners and disinfectants.

Ordinary Dirt and Water-Soluble Stains: Clean with mild soap and water.

Stubborn Stains: Remove with rubbing alcohol.

Disinfect: Disinfect with 20% bleach solution.

Cleaning Code: S/W

Disclaimer:

This guide offers suggestions for the care and cleaning of EnviroLeather™. However, not all stains can be removed, especially if the stains are not addressed immediately. This information does not relieve the user from the responsibility for the correct and safe use of the product and cleaning methods. EnviroLeather™ by LDI is not responsible for any damage incurred with improper cleaning, or defects caused by improper use of cleaning solutions.
